PRODUCT INFORMATION SHEET

BROKIS

Name	NIGHT BIRDS PENDANT EXTERIOR
Type	pendent lamp, outdoor lamp
ID	PC1111

Description

The Night Birds collection by Boris Klimek is also available in a version suitable for exterior use. Night Birds Exterior are identical to the original indoor collection, which was inspired by the freedom and abandon of bird flight. In order to withstand the whims of the weather, the lights have been modified to comply with the IP54 rating for exterior use and weatherproofing. The indoor and outdoor lights share the same engineering, which allows a greater selection of light sources and simplifies installation and balancing. The Night Birds family has been expanded with a interior light called Night Birds MINI. The technologies applied in the Night Birds collection are based on the principles of recycling, sustainability, and environmentally friendly manufacturing. The base material used in the lights is the waste glass generated in the production of other BROKIS collections. This recycled glass material is subjected to several stages of processing using older glassmaking techniques (hand grinding, sandblasting) as well as newer ones (melt moulding, waterjet cutting, mould shaping), giving rise to a skilful blend of tradition and modernity. Each light is an unrepeatable original with its own story. Like the original Night Birds collection, Night Birds Exterior offers three different lights, each with a different wing position, which come in either white or dark (nearly black) variants. At the same time, the collection can be ordered in all available BROKISGLASS colour variants. From now on, Night Birds are as home in the elements or the dark of night as they are in the comfort of the indoors.

Technical description

The technologies applied in the Night Birds collection are based on the principles of recycling, sustainability, and environmentally friendly manufacturing. The base material used in the lights is the waste glass generated in the production of other Brokis collections. This recycled glass material is subjected to several stages of processing using older glassmaking techniques (hand grinding, sandblasting) as well as newer ones (melt moulding, waterjet cutting, mould shaping), giving rise to a skilful blend of tradition and modernity. Each light is an unrepeatable original with its own story.

Glass Colour

grey - triplex opal BROKISGLASS matte	C	CGC3010
