A Private Harbour Shining Day and Night

Buoys mark safe zones and harbours with light – a sure guide for completing successful journeys. BOMMA Creative Director Václav Mlynář found inspiration in the symbolism and shape of buoys, designing lights that create a private harbour in your interior. “The Buoy Collection seeks a balance between sculpture and product design,” he explains. This exciting new addition combines classic geometric shapes, an unusual light source and monumental handblown crystal elements. Its clean minimalist shapes and monumental size allow the Buoy Collection to become a masterful focal point in any space. Buoys embody the best of glassmaking craftsmanship.

Handmade glass attributes

All Bomma products are hand-made from mouth-blown lead-free crystal. Therefore any small bubbles, non-melts and ir-regularities in the glass are both proof and a characteristic feature of this traditional craft.

The Buoy Collection is made by underlying colored glass technology. Thanks to the manual process of blowing underlay glass, each piece is an original. Individual products may vary slightly in intensity, hue or even color. This is an accompanying characteristic of the traditional underlay glass technology.
