Dew Drops Circle Inspiration

A circle of radiant, dew-inspired light..

BOMMA expands its iconic Dew Drops Collection with a new addition, Dew Drops Circle, introducing a fresh dimension of circular harmony accented with organically placed droplets of light. This newest member of the Dew Drops family builds on the unusual aesthetics of the original design, where softly glowing drops evoke the delicate morning dew resting on blades of grass. Dew Drops Circle transforms this poetic vision into a more monumental, spatial form: a ring that can be suspended above a dining table, kitchen island, or lobby area to create a striking, elegant lighting accent.The piece feels simultaneously technical and modern, yet gentle and graceful.

Handmade glass attributes

All Bomma products are hand-made from mouth-blown lead-free crystal. Therefore any small bubbles, non-melts and irregularities in the glass are both proof and a characteristic feature of this traditional craft.
The intensity and color shade of the iridescent metal-coating may vary slightly from product to product. Small dots in the coating, especially visible after the light is on, are not a defect of the product.
