Divina Inspiration

The Light Touch of the Divina, Transformed into Distinct Colors

The Divina Collection emulates the timeless concept of a spherical glass body, combined with the delicate touch of a color gradient, an idea used in the past by DECHEM studio. Divina lights are the younger siblings of the Phenomena Collection. Unlike Phenomena, the Divina lights are smaller and more suitable for intimate interiors. Divina is ideal for use above a desk or dining table, its light source located within the bottom of the cylindrical mounting body. Its refined color gradients lend it an aura of timeless dream worlds, while remaining visually striking.

Handmade glass attributes
All Bomma products are hand-made from mouth-blown lead-free crystal. Therefore any small bubbles, non-melts and irregularities in the glass are both proof and a characteristic feature of this traditional craft.
The Divina Collection is made by underlying colored glass technology. Thanks to the manual process of blowing underlay glass, each piece is an original. Individual products may vary slightly in intensity, hue or even color. This is an accompanying characteristic of the traditional underlay glass technology.
