Flare Inspiration

A glimpse of inner ligh

The beam inside BOMMA's Flare lights its magical spiral structure inside the crystal rod. This collection, designed by Kateřina Handlová, pays homage to traditional glassmaking techniques and allows architects and designers to create distinctive lighting installations for diverse spaces.

Flare Production

Flare bomma

The molten-glass core is covered by small glass shards, then dipped back in molten crystal.

The glassmakers then pull the piece to a desired length, stretching the fragments across the interior of the glass rod

This creates a magical texture inside the rod, seemingly its own Universe, flaring every time a switch is flipped.
