Phenomena Inspiration

Transient images of the eternal

The collection was inspired by simple shapes: a circle, a triangle, a rectangle and an oval. The term phenomenon comes from the Greek word for “appearance”. The forms are what you see on first sight. In Plato’s idealist philosophy, phenomena are transient, likenesses of the eternal, perfect Forms and so are not truly real. This seems very fitting for a collection made in a material that is so difficult yet versatile, so strong yet fragile as glass.

Handmade glass attributes

All Bomma products are hand-made from mouth-blown lead-free crystal. Therefore any small bubbles, non-melts and irregularities in the glass are both proof and a characteristic feature of this traditional craft.

The Phenomena Collection is made by underlying colored glass technology. Thanks to the manual process of blowing underlay glass, each piece is an original. Individual products may vary slightly in intensity, hue or even color. This is an accompanying characteristic of the traditional underlay glass technology.
