Pyrite Inspiration

The fiery stone from the core of the Earth

This BOMMA collection was inspired by pyrite, the golden fire-stone in the shape of a perfect cube, while the silver version of the shade reflects its inspiration in salt crystals. By blowing a molten organic substance into a precise cold form, the skilled hands of our glassmakers create a unique light fixture of elemental, yet perfect shape. The gleaming surface of this hand-blown crystal cube is enclosed from three sides by a polished metal component in either silver or gold tones.
