PRODUCT INFORMATION SHEET

BROKIS

Name AWA LARGE

Type pendent lamp

ID PC1130

Description

In Japanese, the word ‘awa’ is used to describe a bubble of air trapped within a liquid. The design of this delicate light was inspired by the notion of soft glass that has retained its shape after being inflated. The aim is to give the impression of a luminous ball of air floating gently in space when viewed from below. Another special characteristic of the design is that the wood and metal parts appear to be made of glass, as if they were stoppers keeping the air from escaping. A recent addition to the collection is a new version featuring frosted glass in the top half of the light.

Technical description

The craftsmanship applied in production follows in the centuries-old tradition and experience of master glassmakers. The precision crafting of hand-blown glass instills distinctive, enduring character and outstanding quality in all BROKIS products. The glass shades are formed from multiple layers of molten glass, each of which is scrutinized by the master glassmaker prior to being blown into the mold. Up to 70% of the resulting quality is achieved in this stage of production.
