BROKIS

Name	CAPSULA SINGLE
Type	pendent lamp
ID	PC937
Description	Capsula is a sophisticated and exhilarating light bearing resemblance to a plant cell or seed. The nukleus of the piece is a tubular triplex-glass LED light source, developed by BROKIS , that transects the inner shade and translucent external shell to form a notional axis. The layering and overlapping of these three distinct components give rise to dramatic 3D optical effects. The end caps fasten the components together and serve as anchor points for the creative dual suspension straps, which also conceal the power cable and allow for variation in the final positioning of the light. The Capsula collection is offered in sets as well as individual lights that can be combined per customer requirements. As of spring 2018, Capsula is fitted with special integrated connectors developer by BROKIS to facilitate installation and cleaning. Beginning in 2025, the collection features a new BROKISGLASS option, bringing a refreshed visual experience that further underlines the overall singularity of the lights.
Technical description	The craftsmanship applied in production follows in the centuries-old tradition and experience of master glassmakers. The precision crafting of hand-blown glass instills distinctive, enduring character and outstanding quality in all BROKIS products. The glass shades are formed from multiple layers of molten glass, each of which is scrutinized by the master glassmaker prior to being blown into the mold. Up to 70% of the resulting quality is achieved in this stage of production. Each piece is individually processed by the artisan in a series of strictly observed production stages.
