Description

Introducing Comet, an all-new collection of pendant lights combining modern technologies with the timeless beauty of handblown glass. Comet brings a touch of cosmic elegance to the interior in both home and commercial settings. The collection comprises lights inspired by the tail of a comet in the night sky, its effect reminiscent of stardust. The lights are crafted in two shapes – Comet Round and Comet Square – each available in three different sizes. This allows for a wide range of creative compositions, from elegant solitaires to large-scale lighting installations in hotels, staircases, and entrance halls. Each Comet is handblown from laminated glass, with grains of silica sand added between the layers to render a unique celestial effect that gently diffuses the light throughout the surrounding space. Comet pendants are equipped with modern technologies, such as an efficient LED source and diffuser for both direct and indirect lighting, and fluid touch dimming that puts the desired ambience at the user's fingertips. From minimalist arrangements of a few individual lights to breathtaking curtains of night-sky enchantment, the flexibility of the Comet collection opens exciting new lighting possibilities for commercial and public venues, such as hotels, lobbies, and grand staircases.
