PRODUCT INFORMATION SHEET

BROKIS

Name	IVY TABLE BATTERY
Type	table lamp, Battery lamp
ID	PC1233

Description

Ivy Battery by Lucie Koldova is the latest addition to the already substantial Ivy family, which is inspired by nature and its life-giving beauty. Just as a plant grows and climbs up the wall of a house, so too does Ivy branch out in different directions. The collection offers a special modular system for a highly innovative take on variable decorative lighting in vertical and horizontal compositions. The new battery-powered table version is somewhat smaller than the original Ivy Table, which makes it easy to move from one place to another and create unique lighting experiences anywhere, anytime. Although it is not protected from direct contact with water, its portability and robust build quality make it suitable for use in outdoor settings. Ivy Table Battery is touch operated and has three brightness settings for just the right amount of light at a given moment. The lithium battery pack powers the light for up to six hours, and charging is by means of induction or a USB connector. The collection comprises a metal frame and handblown glass shades in matte light rose, opal, or smoke grey. Elegant and precise in execution right down to the smallest of details, Ivy is a high-tech lighting concept ideally suited to project and residential applications. The organic collection takes many forms and rightly holds a place among the so-called bespoke installations. The Ivy Table Battery represents a graceful and flexible lighting object for restaurants and hotels, where it can be unrestrainedly combined in luminous landscapes that change in step with the space around them.

Technical description

The techniques Brokis applies in the production of glass are rooted in centuries of tradition and require remarkable skill from master glassmakers. Precision crafting of handblown glass gives each product a distinctive character and unmatched quality. The glass shades are formed from multiple layers of molten glass, each of which is thoroughly scrutinized by the glassmaker before being blown into the mould. The triplex opal glass of the shades represents one of the finest materials used in the lighting industry today. Together with carefully guarded handcraft techniques, the sandwich structure of two transparent outer layers of crystal and an inner layer of white opal between them lends the glass outstanding visual properties. The branches, canopies, and power cables are available in either white or anthracite grey.

Glass Colour

smoke grey - transparent glass	A	CGC516
triplex opal	A	CGC39
light pink - transparent glass	A	CGC46

Glass surface

acid-etched both side surface	A	CGSU881

Body finish

metal - white matte powder coating with structure	A	CCS2809
metal - anthracite grey matte powder coating with structure	A	CCS2811

Cable colour

silver charging cable USB 2/USB-C, 5V	A	CECL2839
black charging cable USB 2/USB-C, 5V	A	CECL2837

Recommended Bulbs

DIM, 12V, 1.2W, 2700K, 114lm, RA90+	A	CEB1818

Dimmable version

touch dimming	A	CEDV2871
