PRODUCT INFORMATION SHEET

BROKIS

Name	MONA XL PENDANT
Type	pendent lamp
ID	PC1030
Description	The Mona collection is based on the concept of penetrating forms. The light source boldly traverses the ample volume of smooth handblown glass to reveal the thrilling tension inherent in the design. The collection's essence, however, lies in its unconventional construction and refined combination of materials. It also boasts dimmable tubular LED light sources, developed by BROKIS, each with a different colour temperature. The entire Mona family has been technologically improved with innovative connectors and the replacement of the wood components with metal ones. These improvements make it easier to change out the light source and clean the lights. The family comprises several sizes (S, M, L, XL) and various types of lights (pendant, floor, table, wall).
Technical description	Combined craftsmanship / hand-blown glass in combination with metal body. The craftsmanship applied in production follows in the centuries-old tradition and experience of master glassmakers. The precision crafting of hand-blown glass instills distinctive, enduring character and outstanding quality in all Brokis products. The glass shades are formed from multiple layers of molten glass, each of which is scrutinized by the master glassmaker prior to being blown into the mold. Up to 70% of the resulting quality is achieved in this stage of production.
